

HuddleCamHD 10X-USB2

USB 2.0 PTZ CAMERA

INSTALLATION & OPERATION MANUAL

Please check HUDDLECAMHD.com for the most up to date version of this document

Precautions.....

Safety Tips.....

- Please read this manual carefully before using the camera.
- Avoid damage from stress, violent vibration or liquid intrusion during transportation, storage or installation.
- Take care of the camera during installation to prevent damage to the camera case, ports, lens or PTZ mechanism.
- Do not apply excessive voltage. (Use only the specified voltage.) Otherwise, you may experience electrical shock.
- Keep the camera away from strong electromagnetic sources.
- Do not aim the camera at bright light sources (e.g. bright lights, the sun, etc.) for extended periods of time.
- Do not clean the camera with any active chemicals or corrosive detergents.
- Do not disassemble the camera or any of the camera's components. If problems arise, please contact your authorized dealer.
- After long term operation, moving components can wear down. Contact your authorized dealer for repair.

Supplied Accessories.....

- 10X Zoom 1080p USB 2.0 HD Video Conference Camera
- 12V/2.0A DC Power Adapter
- USB 2.0 A-B cable(16ft/4.9m)
- Serial Control Cable
- Wall mount
- RS-232C to RS-485 Adapter
- IR Remote Controller
- Quick Start Guide

Physical Description.....

1. Front View.....

1. Lens

2. IR Receiver

To receive IR remote controller signal.

3. Power LED

Blue LED lights when unit is powered, LED is dark for Stand-By status.

4. IR Receiver

To receive IR remote controller signal.

2. Rear View......

5. DC IN 12V Socket

Only use the Power Adapter supplied with this camera.

6. IR Receiver

To receive IR remote controller signals.

7. RS232 IN Port

For hard wired remote control from a 3rd party PC, joystick, etc...

8. RS485 IN Port

For hard wired remote control from a 3rd party PC, joystick, etc...

9. USB 2.0 Interface

For connection to PC USB 2.0 port. Will also function in a USB 3.0 port as USB 2.0 device.

3. Bottom View.....

1. Tripod

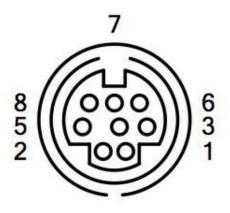

Will accept 1/4-20 bolt from 3rd party tripod, wall or ceiling mount using included tripod adapter.

Cable Connection Info.....

Rev: Enable image flip for ceiling mounting

Connection Instructions.....

- 1. Connect included Power Supply to the camera.
- 2. Wait for camera to come to Home Position.
- 3. Connect included USB 2.0 cable to camera and USB port of PC.
- 4. Select and configure camera in your software of choice.

NOTE: Failure to follow this sequence may result in no connection to PC.

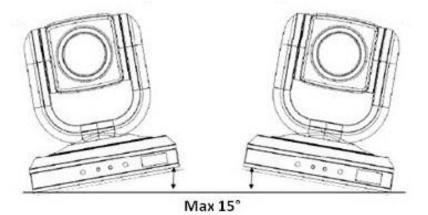

Care Of The Unit.....

Remove dust or dirt on the surface of the lens with a blower (commercially available).

Installation Instructions.....

Desktop Installation.....

When using the HuddleCamHD camera on a desk, make sure that it will stand level. If you want to use the camera on an incline, make sure the angle is less than 15 degrees to ensure that the camera's pan and tilt mechanism operates normally.

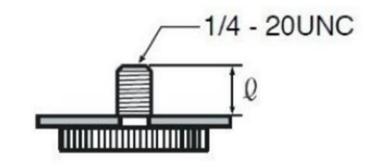

Tripod Installation.....

When using the HuddleCamHD camera with a tripod, screw the tripod to the bottom of the camera. The tripod screw must fit below specifications:

Note: Tripod must stand on a level surface.

$$Q = 5 - 7 \, \text{mm}$$

USB Connection.....

Important Notes Regarding USB Connectivity:

USB 3.0 ports are backwards compatible with USB 2.0 devices. USB 2.0 ports are not completely forward compatible with USB 3.0 devices (some USB 3.0 devices will connect to USB 2.0 with limited functionality).

External USB hubs should be avoided (i.e. give the camera its own USB port on the device) as they are not well suited to transmitting HD video reliably.

USB extension systems must be fully compatible with the version of USB that you are using and must utilize an external power supply, when required. Caution: Some "compatible" USB 3.0 extenders do not actually have the full 5Gbps bandwidth required for uncompressed HD video - so check bandwidth specs. Always connect the HuddleCamHD camera directly to the device in order to associate the UVC drivers before attempting to use any extension system.

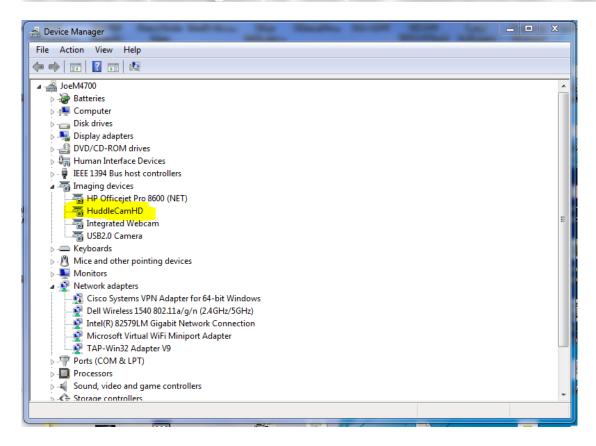

USB 3.0 power saving settings in the device's operating system should be turned off completely for reliable USB 3.0 camera connectivity.

HuddleCamHD Cameras

All HuddleCamHD cameras utilize the UVC (USB Video Class) drivers that are built into Windows, Mac OS and Linux to stream HD video to your device via your device's USB port (USB 2.0 or USB 3.0 depending upon HuddleCamhD camera). When your device successfully recognizes the camera, your device will register the HuddleCamHD camera as an "imaging device".

You can see this in your Windows Device Manager program (type "device manager" into the Windows search tool) as shown in the screenshot, below:

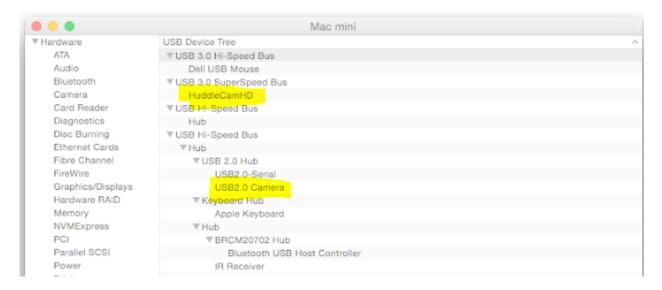

In this example, you can see the HuddleCamHD camera in use connected as a fully functional USB 3.0 device (HuddleCamHD) as well as a USB 2.0 device with limited functionality (USB2.0 Camera).

If your device has not connected to or has not recognized the HuddleCamHD camera as an imaging device (in which case, you may see a new "unknown device", "Westbridge" or "CYTFX3" labeled device show up in Device Manager's "Universal Serial Bus Controllers" section rather than in the "Imaging Devices" section), the HuddleCamHD camera will not be available to programs that utilize a camera. In this case, try restarting the device and reconnecting the camera via USB (USB 2.0 or USB 3.0 depending upon HuddleCamHd camera).

Similarly, you can see a connected device in System Information on a MAC. See screenshot below:

In this example, you can see the HuddleCamHD camera in use connected as a fully functional USB 3.0 device "HuddleCamHD" as well as a "USB2.0 camera" with limited functionality (USB2.0 camera).

Specs

Model Number: HC10X-USB2-(xx) Color (xx): BK=Black; WH=White

Camera & Lens

• Video CMOS Sensor 1/2.9" HD Sony CMOS, 2.1 Mega Pixel

• Frame Rate 30fps 1920 x 1080

• Lens Zoom 10X Optical Zoom f=4.7 47mm

• Min Lux 0.1 Lux at F1.6

• **Field of View** 8° (tele) to 60° (wide)

• Warranty 2 Years

Pan/Tilt Movement

• Pan Movement ±175°

• Tilt Rotation Up: 90°, Down: 30°

• **Presets** 64 Presets

Rear Board Connectors

• Video Interface USB 2.0, UVC 1.5

• Control Signal Interface UVC 1.5 - Mini DIN-8 (RS232 IN, RS485 IN, Pelco-D/P

IN/OUT)

• Control Signal Config. Dome - On Screen Display Menu

• Baud Rate 9600 bps

• Power Supply Interface DC 12V 2A

Electrical Index

• Power Supply Adapter 12V DC 2A

• Input Voltage 12V DC (10.5-14V DC)

Input Power 24W (Max)Working Environment Indoor

Physical

• Material Aluminum, Plastic

• **Dimensions** 4.88"W x 5.5"H x 4.75"D (6" H w/ Tilt up)

124mm x 139mm x 120mm (152mm H w/ Tilt up)

• **Weight** 1.66 lbs (.75 kg)

• Box Dimensions 8.75" x 8.88" x 7" (222mm x 225mm x 178mm)

• **Boxed Weight** 3.66 lbs | 1.66 kg

• Color Black & White

Operating Temperature 32°F to + 113°F (0°C to +45°C)
 Storage Temperature -14°F to 140°F (-10°C +60°C)

• Working Environment Indoor only
